- ✓ Create budget for new projects
- ✓ Prolong the life of existing equipment
- ✓ Meet your W.E.E.E compliancy
- ✓ Refresh & Refurb

Equipment We Can BuyBack

SAMSUNG

✓ Laptops, Servers & Desktops

✓ Network Equipment

✓ Handsets & Mobiles

✓ Headsets

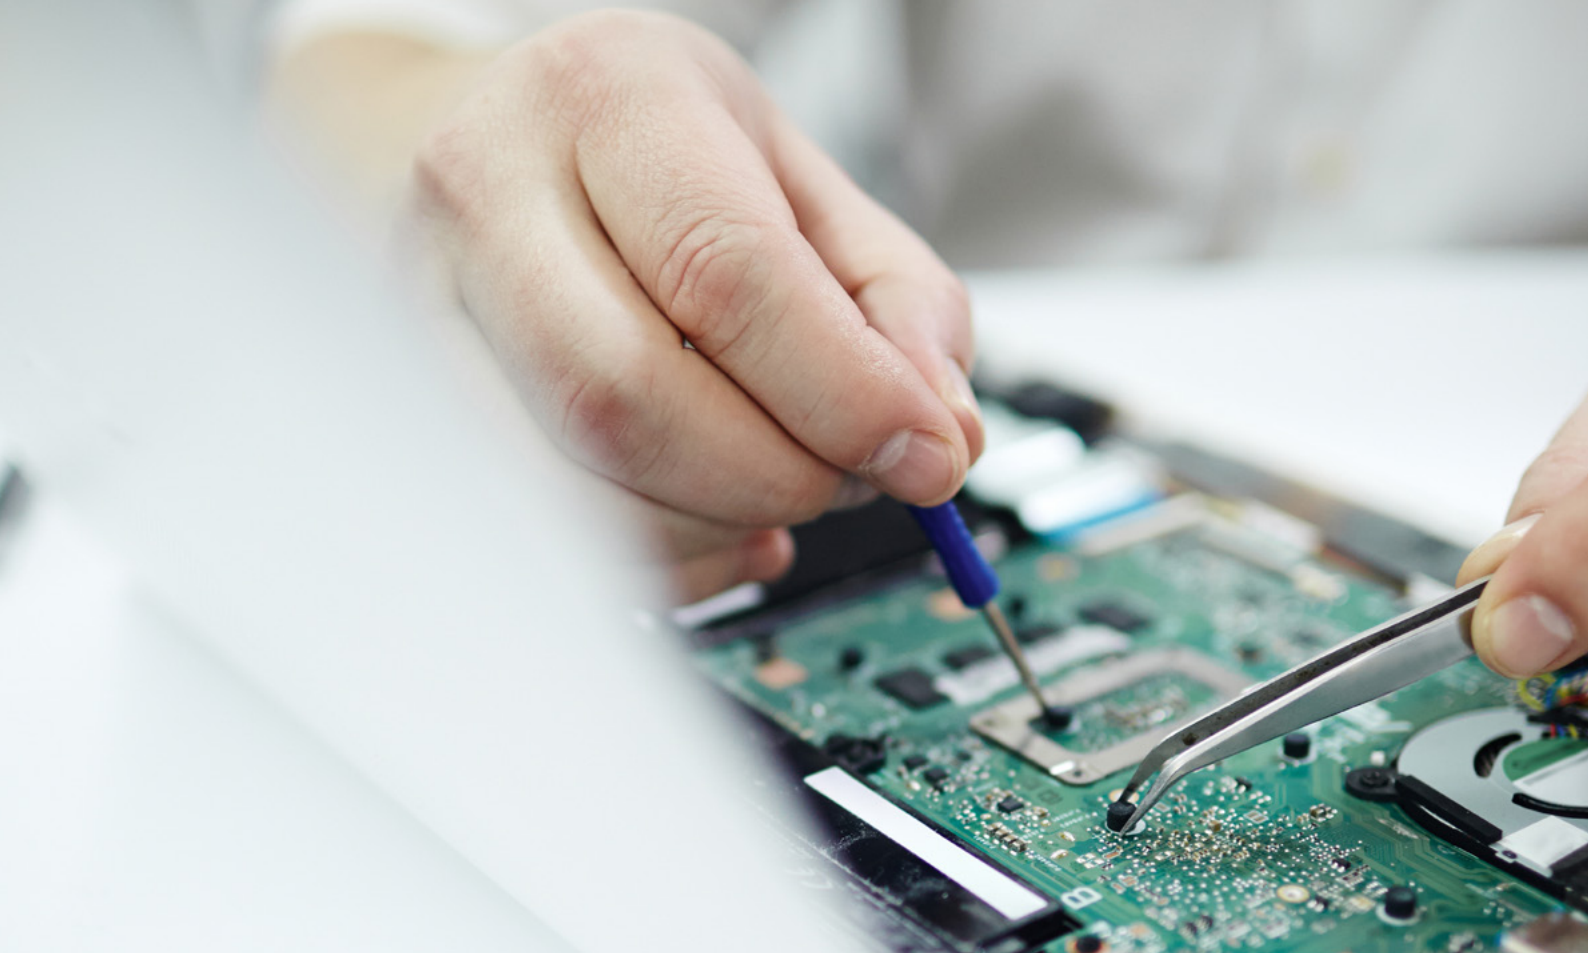

Other solutions we offer

As well as our BuyBack service, we offer other solutions which allow you to prolong the life of your existing equipment.

Refresh and Refurb

If your budget doesn't stretch to purchasing new equipment, then we can take a look at your existing stock. We have the ability to service, test and repackage your existing equipment to ensure they can continue to be used, whilst saving your business money.

Refurbishment

Prolong the life of your existing equipment with our Refurbishment Services, benefiting from huge cost savings. If your budget doesn't stretch to purchasing new equipment, then we can take a look at your existing stock where we will service, test and repackage to ensure they can continue to be used.

Using your existing stock and assets would represent a huge cost saving, which you could use to off-set against other project costs.

Headset and Handset Refresh

We recognize that headsets and telephony products can often be disposed of before necessary when it is still functional and has plenty of useful life still left. This could be down to staff turnover, office refurbishment or health and safety concerns with new starters which results in new products being purchased.

At Avoira, we can extend the life of your headsets and telephony products by sending your used hardware to us. These products will be fully and hygienically cleaned, have perishable accessories replaced such as ear cushions, curly cords tested for complete functionality and boxed up to the redeployed across your workforce, all for a fraction of the cost of a new device.

W.E.E.E Compliance

We all have a responsibility to minimize electronic waste and our BuyBack, Refresh and Recycling service provides you with a secure and sustainable way to dispose of your used, excess and redundant IT equipment.

For a small fee, we can dispose your unwanted equipment with our fully compliant disposal services, with the W.E.E.E directive ensuring that you meet Government disposal directive.

Which solution is best for me?

Speak with a member of our team today to discuss which potential redundant equipment you have and find the best solution! We can give you a price for your old equipment and help you save some money on the purchase of new technology, whether it be cash or credit against your account.

Alternatively, we can provide a trade-in valuation to offset the purchase of new hardware.
