This powerful workhorse combines durability and simple user-friendly design, providing a comfortable and reliable experience.

### Key features:

- Excellent coverage range
- Enhanced Audio
- Robust and Rugged meeting military spec MIL-STD 80.
- Longer Battery Life compared to DP1400

Looking to refresh or add to your fleet of radios, contact us today to learn more!

## Radio Systems

Avoira provide a multitude of solutions for the infrastructure required for your site to remain in constant contact.

From single sites, with multiple channels, to fully managed and supported multi-site, multi-channel offerings, we have options available for you. On top of that, we can overlay key features such as:

- Efficient channel sharing providing multiple groups access to a common platform
- Emergency features – safeguarding and helping to protect employees
- Control and Priority of your key messages to make sure they are communicated when needed

If you are struggling with your coverage, or looking to enhance your overall feature set, please get in touch with your account manager to discuss the options we have available.

## Body Worn Cameras

A Body Worn Camera can be used for a variety of reasons, such as capturing evidence or enabling a faster response when a situation arises. Body worn video cameras also help protect staff, support training and demonstrate professionalism.

The Motorola VB400 and VT100 cameras provide a host of features to help protect you.

### Key features:

- Full HD Recordings
- GPS
- Live Streaming
- Bluetooth connectivity
- Integration into CCTV Systems
- Ability to link to Radio handsets for enhanced emergency protection
- Robust and Rugged

Each of these products or features plays a vital role in enabling efficient and reliable communication, enhancing safety, and improving operational effectiveness in various industries.
