Why Hire Radios from Avoira

Two-way radios provide reliable, instant, push-to-talk communications across all zones of operations. With superior voice clarity, long battery life and outstanding range, you can ensure you can hear and be heard.

Here's why radio hire is not just effective, but essential:

Instant Communication

Radio systems provide instant communication at the push of a button. Unlike mobile phones that require dialing and waiting for someone to pick up, radios facilitate immediate contact.

Wide Coverage

Radios operate on specific frequencies and can cover large areas, ensuring that your team stays connected across expansive sites. This is particularly valuable in outdoor events, construction projects, or security operations.

Reliability

Two Way Radios are designed to be robust and dependable even in challenging environments where mobile phone signals might be weak or unreliable. They are resistant to interference and offer consistent performance.

Enhances Safety

Radios enable immediate communication during emergencies or critical situations, allowing for swift responses and potentially avoiding accidents.

Cost-Effective Solution

Hiring radios for short-term projects or events is a cost-effective option compared to purchasing and maintaining a communication system.

Easy to Use

Radios are user-friendly devices that require minimal training. They come with simple controls and clear instructions, ensuring that team members can start using them without experience.

Radios prepped and ready to go!

Discover our wide range of pre-licensed, quality checked Radios with Ofcom approved technology. With nationwide delivery and over 40 years' experience, we can provide the radio hire solutions to fit your needs.

For critical communications hire is the only option that is both cash and time conscious. Our radios offer loud, clear communication to ensure that your voice is always understood.

We offer repair, hire and support services to assist with system installations and provide advice on critical communications.

We supply to various industries such as; education, construction, hospitality, festivals, retail, agriculture, tv & film, logistics and security.

Radios with features to suit your needs

We supply a range of different radios with features to suit all kinds of environments, such as:

- Enhanced Privacy and Security
- Long Battery Life
- Programmable Buttons
- Accessory Compatibility
- Certified to ATEX standards
- Man Down and Lone Worker features
- Digital and analogue operations

Radio accessories are available including, extra batteries, antennas, RSM's, chargers, earpieces, radio cases and more!

“

A decision was made on reliability. Because the radio system is so critical to us, if it goes down we need to know we can rely on a good support service. We knew from their track record that Avoira could deliver this.

All Inclusive Hire Services

Our all-inclusive radio hire packages are designed to meet the diverse communication needs of businesses and events, ensuring seamless and efficient operations.

These packages offer a comprehensive solution by providing top-of-the-line radio equipment, accessories, and support services, all bundled into one convenient package.

We also provide the hire and sale of body worn cameras.

Customisation and Flexibility

We understand that every project is unique. Whether you need radios for a day, a week, or a month, our flexible rental periods ensure you only pay for what you need.

All our packages come with:

- Programming Services
- Adjustable contracts
- Required licenses

Delivery and Collection

To further enhance convenience, our packages include delivery and collection services. We will deliver the equipment to your location and collect it once the rental period is over, saving you time and effort

Nationwide delivery available, we've got offices in Bristol and Bury so we are ready to deliver a quality package and service up and down the country.

We can offer next working day delivery on simple hires.

Expert Support and Maintenance

Our all-inclusive packages come with comprehensive support. Our team of experts is available to provide technical assistance and ensure the radios are functioning optimally throughout the rental period.

Any issues with radios or batteries during your hire and we'll swap them for new ones. All faults reported are normally sent replacements within 24 hours on a working day and the fault is collected free of charge.

As part of your contract we offer:

- System Configuration
- Installation and De-Installation, On Site Support
- Engineering Support

Case Study: Middleton Harriers

Middleton Harriers is a running club that organizes various races in the North West of England. One of their most popular events is the Hopwood Trot, a 5.5-mile race that attracts both serious and recreational runners.

To ensure the safety and success of the Hopwood Trot, the club relies on a two-way radio system provided by Avoira. This system allows for clear communication across the entire race course, even in challenging terrain.

The DP 4400e digital two-way radios hired from Avoira have been instrumental in coordinating the event, ensuring the safety of participants, and managing the logistics of the race.
