

TopCat Healthcare Compliance & Auditing Management Solution

The Clever Compliance,
Auditing, and Reporting Tool

About TopCat

TopCat is an adaptable digital compliance monitoring system designed to streamline compliance and auditing across healthcare facilities. By reducing auditing and reporting time by over 50%, TopCat provides intuitive tools for quick learning and integration, all accessible on mobile and desktop devices. With automated data collation, TopCat enables efficient performance monitoring, identifying compliance issues promptly to ensure consistent standards and enhanced service delivery.

Key Benefits

Time Efficiency

Cuts down auditing, reporting, and compliance time significantly, freeing up staff for other tasks.

Automated Auditing

Easily conduct audits on any smart device, desktop, or tablet.

Instant Reporting

File comprehensive audit reports directly from any specified location.

Flexible Audits

Run audits automatically, on a schedule, or spontaneously based on immediate needs.

Cost Efficiency

Reduces operational costs across multiple audit categories.

Cross-Category Data Capture

Allows single auditors to collect cross-category data from any location.

Regulatory Compliance

Assists in meeting statutory obligations, corporate targets, and SLAs.

Digital Archiving

Facilitates easy retrieval of audit records for QA, accreditation, and performance assessments.

Accurate Assessments

Generates precise reports for evaluating practices and systems across departments.

Key Features

Bespoke Reporting

Customize audit categories, asset tracking, and locations with .csv export options for extended analysis.

Dashboard

View data live on a real time dashboard, completely customizable to your needs.

Recurring Audits

Set up audits that recur automatically or on fixed schedules.

Comprehensive Reporting

Email or print a complete range of reports for immediate review.

Multi-Media Documentation

Sync notes, photos, and signatures with your TopCat database via Wi-Fi, 3G/4G/5G, or USB.

Issue Resolution

Flag items for corrective action directly from audit findings.

Focused Access

Limit feature visibility based on auditor responsibilities.

QR/Barcode Assignments

Easily access and manage audits through QR and barcode scanning, facilitating both scheduled and ad-hoc audits.

“TopCat ensures compliance on audits and reporting. Integrated with CARPS for issue resolution and Locator for asset tracking, it ensures non-compliance is swiftly addressed while maintaining high standards in patient care.”

Integrating TopCat with CARPS

Maximise Productivity while Enhancing Service Standards

The TopCat and CARPS integration streamlines patient support services by combining CARPS' smart task management and performance tools with TopCat's robust compliance and auditing system. This integrated approach ensures a seamless workflow, reducing time spent on task allocation and improving audit resolution times.

Integration Example

During a fire safety audit, Helen identifies a failed emergency light in Corridor 1A. With TopCat, she marks it as a failed audit item and adds notes. TopCat synchronizes with CARPS, automatically logging a corrective task for a technician without any additional calls or logging needed. This integration enables prompt issue resolution, creating an efficient audit trail and reducing manual intervention.

Compliant Across Service Standards

TopCat ensures compliance in critical operational areas.

Why Choose TopCat?

TopCat is a proven compliance solution with over 50% time savings on auditing and reporting. Its flexible design suits diverse organizational structures, supporting a wide range of audit types and streamlining compliance management.

TopCat Features Summary

On-the-Fly or Automated Audits

Flexibly create or schedule audits.

PC or Mobile Compatibility

Conduct audits on both PCs and Android devices.

Offline Functionality

Complete audits without constant connectivity.

Customisable Comments and Evidence Capture

Add notes and photographic evidence.

CARPS Integration for Issue Resolution

Assign rectification tasks directly through CARPS.

Instant Detailed Reporting

Generate comprehensive reports as audits complete.

Standards Compliance

Measures against NHS Cleaning Standards 2021 or other regulatory benchmarks.

Location and Asset Identification

QR and barcode scanning for secure location tracking.

TopCat and CARPS Integration Workflow

1. **Complete Audit** with TopCat
2. **Identify Non-Compliance** and log via TopCat
3. **Automated Job Creation** in CARPS for immediate task allocation
4. **Resolution Task Assigned** through CARPS to rectify non-compliance
5. **Non-Compliance Resolved** and documented via CARPS
