

Small Meeting Rooms

Enhance your space with Yealink

Yealink

Optimising Huddle Rooms with the Yealink MVC S40

Small meeting spaces, or huddle rooms, demand a compact yet high-performance audio-visual setup to ensure effective communication and collaboration. Unlike large boardrooms, these rooms require technology optimised for short-range interaction. The Yealink MVC S40 is purpose-built for such environments, providing an all-in-one Microsoft Teams Room system tailored specifically for small spaces.

Enhanced Video for Smaller Spaces

In huddle rooms, where seating is close to the screen, capturing everyone in view can be a challenge. The Yealink MVC S40 features a SmartVision 40 camera with a wide 120-degree field of view, ensuring that every participant is visible—no matter how close they are to the camera.

Its dual 48MP cameras, paired with intelligent features like auto-framing and active speaker tracking, ensure meetings remain dynamic and engaging, offering a professional video experience even in compact settings.

Crystal-Clear Audio for Effective Conversations

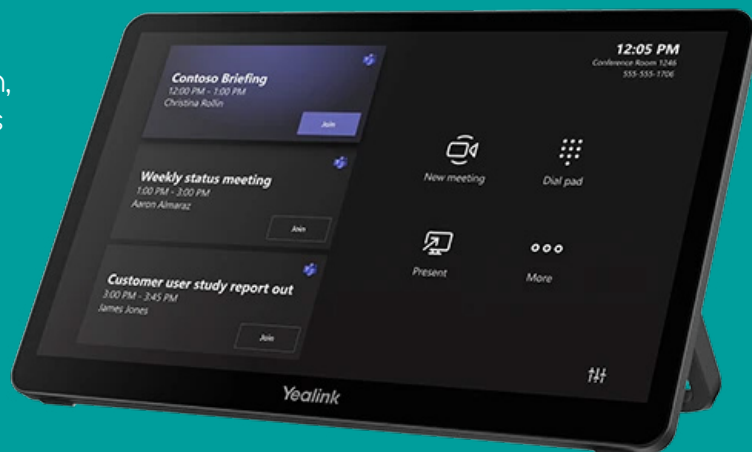

Great video is only half the story. The MVC S40 includes an advanced 8-microphone array with built-in noise cancellation and echo suppression, providing crystal-clear audio pickup that makes conversations feel natural—even in small spaces.

With full-duplex audio and AI-enhanced sound processing, the system allows for seamless two-way conversations, eliminating audio dropouts and interruptions.

Avoira's Expertise in Huddle Room Solutions

Future-Proofing Small Meeting Spaces

As hybrid working continues to shape the modern office, huddle rooms play a key role in team agility. The Yealink MVC S40 offers a scalable, high-performance collaboration solution that meets today's needs and tomorrow's demands, without the complexity or cost of larger systems.

With the help of Avoira, your organisation can stay ahead with future-ready technology, backed by expert support and seamless integration.

Avoira's Expertise in Installation, Consultancy, and Support

At Avoira, we create custom communication solutions that help businesses make the most of their meeting room tech.

We handle everything from the first consultation and system design to installation and full integration. Our team makes sure your Yealink MVC S40 is perfectly set up for your environment, so you get crystal-clear audio and video every time in your small meeting spaces.

And we don't just walk away after installation. Avoira provides ongoing support and maintenance to keep your system running at its best. Our managed services cover remote monitoring, troubleshooting, and regular updates—so your setup stays future-proof, reliable, and ready to go whenever you are.
