

Security You Can Hear

MAKE THE PROFESSIONAL CHOICE!

In today's world of hybrid work and digital communication, conversations are more valuable than ever, and protecting them is critical. Jabra believe that crystal, clear audio should always come with peace of mind. That's why security is built into the heart of their products.

BUILT-IN PROTECTION

Jabra headsets, cameras and speakerphones don't just sound and look good, they keep your communications private. Whether you're on a call with a client, a colleague, or a government official, your voice and video is protected by advanced wireless security that stops unwanted people from tuning in and preventing man in the middle attacks.

STRONG ENCRYPTION

Think of encryption as a secret code. Every Jabra device uses this code to "lock" the communication so only you and the person you're talking to can receive it. It's the same level of protection trusted by governments and financial institutions.

ONGOING SECURITY UPDATES

Technology evolves quickly, and so do security risks. Jabra products are supported with regular updates to make sure your devices stay protected throughout their life.

SAFE PAIRING

When you connect your headset to its base or adapter for the first time, it creates a secure link that can't be copied by anyone else. That means no outsider can eavesdrop or sneak in and connect to your call.

INDEPENDENT APPROVAL

Don't just take our word for it, many Jabra devices have been tested and certified by independent security organisations, so you know they meet strict global standards.

WHY IT MATTERS

From financial services to healthcare, government to legal work, sensitive information is shared every day through headsets, cameras and speakerphones. Jabra gives you the confidence that your conversations are private, secure, and protected from start to finish.

At Avoira, we're committed to providing you with the latest and best unified communication devices. Our solutions are tailored to meet the unique needs of your business, ensuring seamless connectivity and collaboration. Talk to our team, we are here to answer your questions.
