Fluent in technology

Over nearly five decades we've become fluent in a range of complementary technologies that empower our clients to enhance their communication, productivity and service delivery.

We couple our technological articulacy with an impartial, expert consultancy service, ensuring that our client needs are always at the heart of every solution we deliver.

We're unique in designing, delivering, supporting and managing highly sophisticated and effective solutions that harness our varied specialisms and cutting-edge technologies.

These include everything from two-way radio systems, through to cutting-edge unified communications platforms, tariff-free internet-enabled telephony and potent AI-powered Customer Experience (CX) software.

Working for you. Working with you.

As well as working for, we work with our clients. We build strong, trust-driven partnerships that ensure we truly understand and can effectively satisfy your organisation's needs. Every time, on time.

It also means we're always there for you, whether providing highly responsive technical support or fully managing your services.

By building long-term relationships we deliver increasing value and returns to our clients.

AV Solutions & Video Conferencing

At Avoira, we offer a range of Audio Visual and Video Conferencing Solutions to empower your workforce to work remotely whilst still needing to participate in meetings at the office. Bring your employees together with the best video conferencing technology and design your workplace with a variety of room sizes: small, medium and large rooms.

We can help you to design, install and support your offices with a Conference Room Audio Visual System, equipped by a range of our industry leading partners.

Hybrid Working

What is Hybrid Working?

Over the recent years, Hybrid Working and Communicating efficiently has become popular meaning businesses are now looking to offer their employees the best of both worlds. Whether it's collaborating in person at the office, at a hospital or any other usual workplace, collaborating remotely from anywhere, or travelling on the go.

Deliver feature-rich, reliable and easy-to-use communications with a range of high-quality equipment and devices including meeting room screens, meeting room audio solutions, headsets, webcams, desktop screens, speakers and more, from our leading partners.

Meeting Spaces vs Personal Work Spaces

Meeting spaces serve as collaborative hubs, fostering teamwork and idea exchange, often equipped with technology for presentations. Personal workspaces, on the other hand, provide individuals a focused environment to execute tasks, offering privacy and customisation to enhance concentration and productivity. Both contribute uniquely to overall work efficiency and effectiveness.

We have a range of room solutions for every meeting room size or area within a business building.

- Conference & Large Meeting Rooms – A bespoke, integrated audio, visual and video conferencing solution that is reliable and effective.
- Huddle Spaces – More informal and versatile meeting spaces are perfect for impromptu or more casual gatherings.
- Small Meeting Rooms – Enhance meeting experience and interactions by incorporating audio, visual and video conferencing technology with display screens.
- Desktop & Mobile – Powerful messaging, meeting and calling applications that are designed to bring people together wherever they are and whatever device they are using.

Microsoft Teams Rooms

Enhance your meeting experiences with Microsoft Teams Rooms into a modern meeting space solution. Adapt your office space and update your technology to meet the needs of a hybrid workforce, allowing everyone in their meetings to feel closer and more engaged, enabling them to collaborate fully with no restrictions.

Microsoft Teams Rooms brings together the digital workspace of Microsoft Teams with Microsoft certified audio and video devices, no matter the size of your meeting space.

BYOM

With Bring Your Own Meeting (BYOM) Solutions, you have the freedom to use your own device to host your online video conferencing and meetings, using your chosen conferencing solution.

Having the freedom to choose what works for you allows you to communicate, collaborate and present, when and where they like – a dynamic workplace experience like no other.

- Flexibility for employees, to boost satisfaction
- Familiarity with tools and technology, to improve efficiency
- Ability for individuals to use their own devices, to increase productivity

Workplace Management

Make workplace management simple with a range of cutting-edge technology. Implementing the correct solutions to successfully manage your workplace is becoming increasingly important, with a range of meeting rooms and hot desking becoming normality and replacing the traditional office setting.

Organise your workflow with our bespoke room scheduling systems that are custom designed to help you easily and efficiently manage your meeting rooms and spaces. Our room scheduling systems allow users to check the availability of meeting rooms and make reservations from any device via a variety of applications.

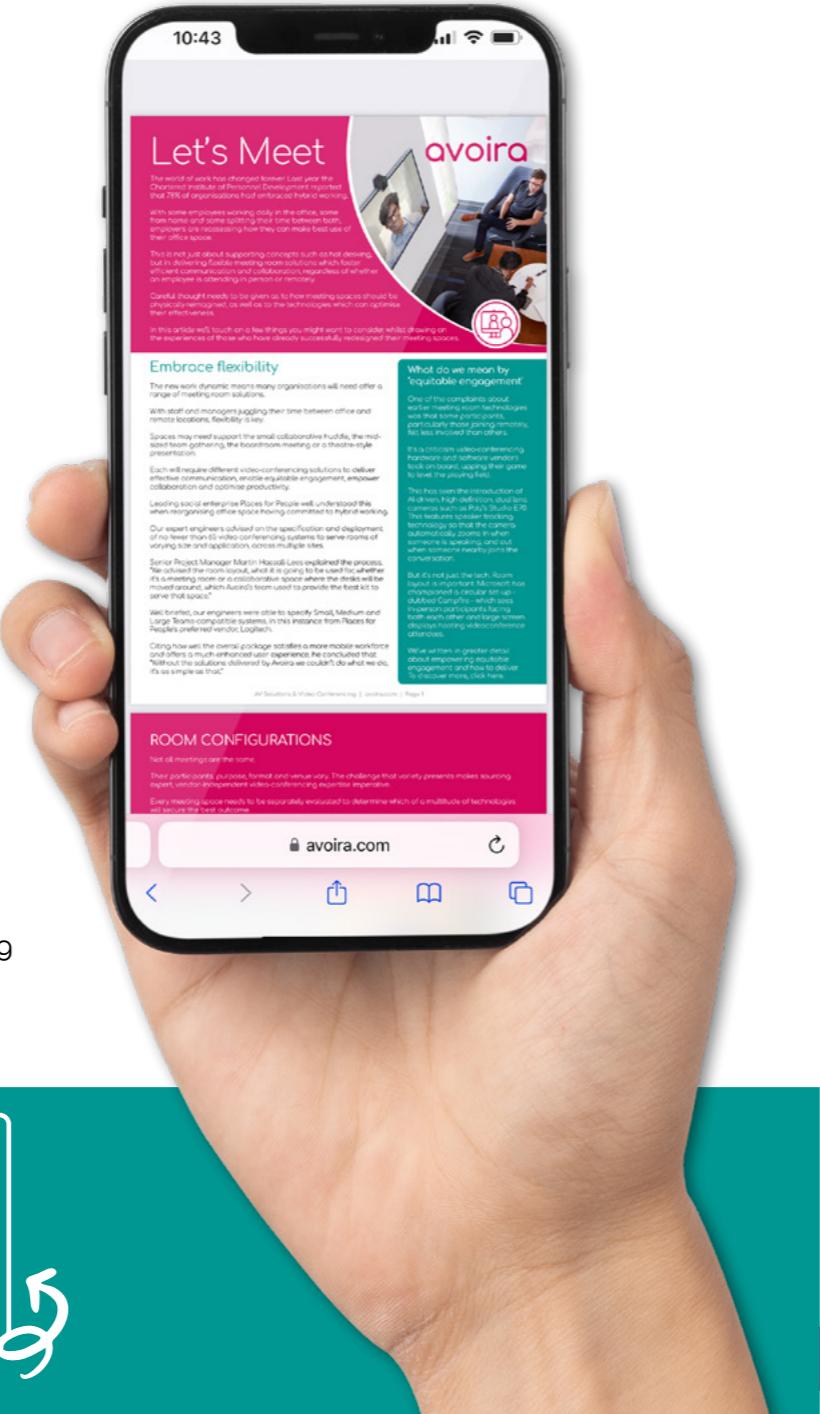

Lets Meet!

The world has changed forever. With some employees working daily in the office, some from home and some splitting their time between both, employers are reassessing how they can make best use of their office space.

Careful thought needs to be given as to how meeting spaces should be physically reimagined, as well as to the technologies which can optimise their effectiveness.

In this article, we touch on a few things you might want to consider. Read more by scanning the QR code.

Case Study: Places for People

Places for People is the UK's leading social enterprise who create and support thriving communities through the development of homes, schools, shops, community and leisure centres.

They were previously equipped with an ageing two-vendor video conferencing estate, which did not offer a standardised user solution. After the pandemic, Places for People committed to a permanent move to hybrid working which meant video conferencing could be deployed across all parts of the business.

Find out more about how we helped Places for People upgrade their technology and implement a seamless Hybrid Working Solution. Read more by scanning the QR code

Work from Home

Creating a Home Office

It's important to have high-quality technology to create seamless communication when working from home, with a range of devices, screens, wireless keyboards and mouses and more.

Microsoft Teams

Microsoft Teams facilitates remote collaboration with seamless communication, video conferencing, and document sharing. Its integrated platform enhances productivity, ensuring effective teamwork and connectivity.

Supporting Devices

We offer a range of supporting devices to support each individual and the way they work, wherever they are. From headsets, webcams, screens and more to deliver reliable and easy-to-use communications.

Bring Your Own Meeting

Equipping your employees with a Bring Your Own Meeting solution gives them flexibility to use their preferred communication devices and choose the platforms and solutions that suit their work style and preferences.

It promotes flexibility, cost-effectiveness, customisation and adaptability to enhance employee satisfaction, increase productivity and simplify remote collaboration.

Philips 273S1 Monitor

Work on the Go

Microsoft Teams

Microsoft Teams enables seamless collaboration on the go, offering real-time communication, document sharing, and video conferencing. Its mobile-friendly interface ensures productivity, connecting teams effortlessly for agile remote work.

Supporting Devices

We work with a range of industry-leading partners who offer a range of supporting devices to support each individual and the way they work. From a range of headsets, webcams, soundbars, screens and more to deliver reliable and easy-to-use communications, no matter where they are working.

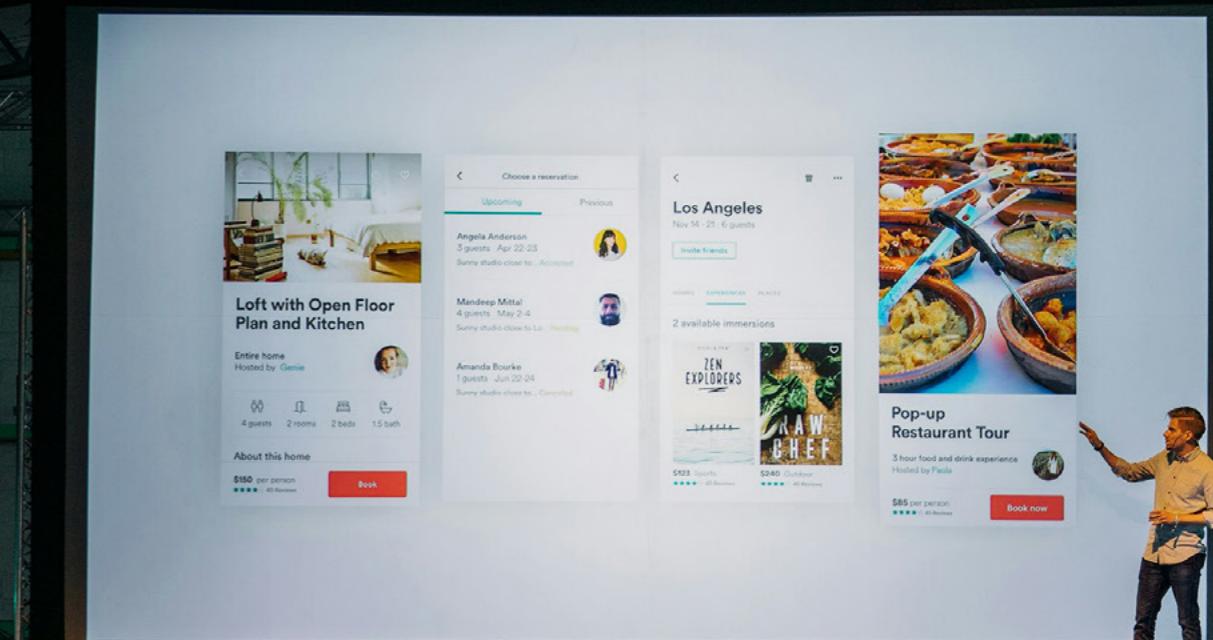

Bring Your Own Meeting

Implementing a Bring Your Own Meeting solution to employees who are regularly on the move enables flexibility and connectivity. Utilising the preferred tools ensures seamless communication, increasing productivity, while accommodating diverse work locations and preferences for effective remote collaboration.

Presentations & Promotions

At Avoira, we offer a range of audio-visual solutions for presentations and promotional screens which feature a range of high-end technologies. From high-definition projectors, interactive displays and LED video walls that all offer dynamic visuals.

In addition, integrated sound systems, microphones and interactive touchscreen features all enhance engagement to staff members and customers in attendance. With the ability to display impactful and customisable presentations and promotions, our range of solutions create immersive, memorable experiences for audiences in various settings, from boardrooms to retail spaces.

Lecture Theatres & Board Rooms

Screen

Implementing audio-visual screens into your lecture theatres and board rooms enhancing communication by providing a dynamic presentation experience. With high-quality visuals, interactive displays and integrated sound systems will engage audiences effectively, encouraging better understanding and collaboration.

Sound

It's important to install high-quality audio sound for clear communications ensuring that every participant hears information distinctly. A high-quality sound system promotes engagement and effective collaboration, contributing to the overall success of presentations and meeting.

We work with a range of industry leading partners who can cater to all room sizes, ensuring all your participants can hear clearly and effectively.

Projection

Display your visual content on a large-scale onto screens or surfaces with space saving projectors. Projectors offer a range of advantages including flexibility, cost-effectiveness, enhanced communication and collaboration, and increased engagement from attendees within the room.

At Avoira, we can work with you to discover what you need dependent on your space and room taking into consideration a range of different challenges including connectivity options, interactive or touchscreen displays, screen brightness and more, catering to the needs of users within the environment.

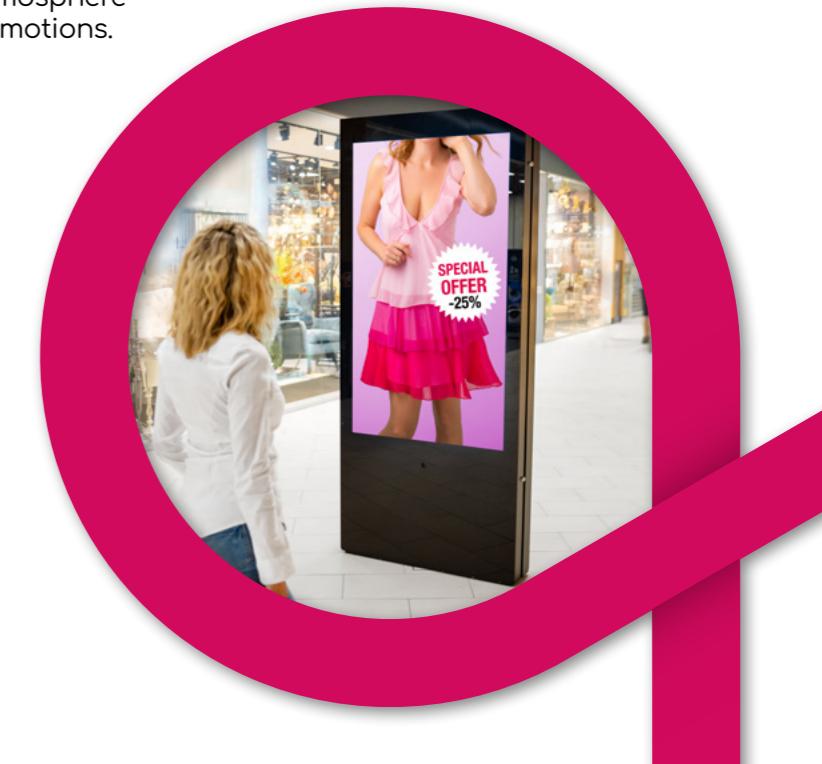

Reception Areas & Shopping Centres

Screen

Capture your audience with a range of dynamic content in your building reception areas and shopping centre's with outstanding audio-visual screen solutions. At Avoira, we can give you the ability to showcase your brand and important marketing and business messages on a large, vibrant scale to ensure that it catches your staff and customers eyes.

Advertising & Information

Implementing audio-visual screens capture attention effectively, with dynamic visuals and sounds. They serve as excellent information hubs, enhancing the overall experience, with engaging visuals and targeted messaging to create a welcoming atmosphere whilst providing valuable information and promotions.

Additional Services

Consultancy

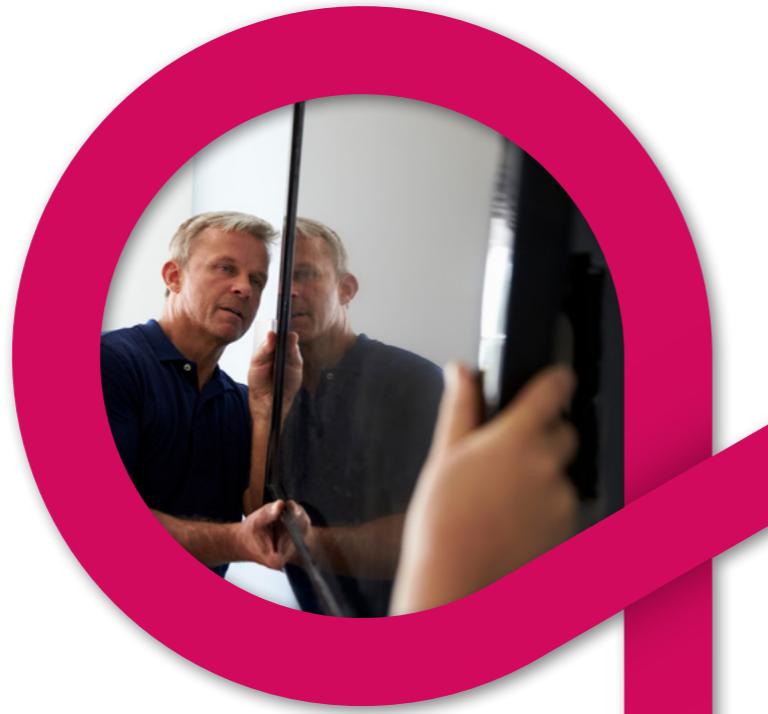

We collaborate with you to understand your business challenges and requirements, to align the correct products and services to help you overcome these business challenges. Our experienced team of Technology Consultants and Solution Architects will produce a high-level solution design (HLD), which include a number of options for consideration.

Our team take into consideration a range of different options to help you overcome your business challenges and requirements, ensuring you receive a high-quality solution and service.

Installation

Our team of experts will ensure that your audio-visual equipment is set up to the highest standard, guaranteeing a seamless setup and functionality. Our expert assistance provides peace of mind, reduces technical issues, optimal performance and seamless operations. Contact us for more information.

Support

We offer a wide choice of maintenance and support packages to suit all sizes of businesses. Whether you need only weekday, office hours support or your organisation demands full 24/7/365 cover to optimise operational integrity and critical business continuity, we have a package for you.

Our available services range from pre-planned maintenance right through to hot desk troubleshooting so that you can reduce downtime, maximise efficiency and concentrate on the effective management.

Managed Services

Avoira gives you flexible purchase and managed service options, from a fully outsourced managed service through to bolt-on services to support companies who need specialist help or cover during holidays. Our accredited engineers have a wealth of experience, so you get the relevant support and expertise across our entire portfolio.

There are a range of benefits including bespoke design around specific requirements, flexible payment terms, discounted multi-year managed contract, system monitoring and real-time alerts and more.
